SUMMARY

Full-stack developer (frontend-focused) with experience in building scalable web and mobile applications using React, Next.js, NestJS, React Native, and Firebase. Proficient in API integration, authentication, and real-time data handling using Firebase, along with database design using Prisma and PostgreSQL. Skilled in Stripe and PayTab payment systems, and focused on delivering high-performance, responsive UIs.

WORK EXPERIENCE

SOFTWARE ENGINEER I | SORA LABS **May 2025 – Present**

- Contributed to two major web applications built with **Next.js** and **Firebase**, one of which included a real-time chat system for an educational platform.
- Refactored** legacy codebases to align with **modern best practices**, improving maintainability and performance.
- Worked on **Firestore** for data management and **Firebase Authentication** for secure access control.
- Collaborated with designers to enhance UI and UX, implementing thoughtful interface changes based on **user behavior** and product goals.

ASSOCIATE SOFTWARE ENGINEER | APPTYCOONS **Dec 2023 - Apr 2025**

- Developed and integrated APIs using **React Query** in a **Next.js** and **NestJS** environment.
- Managed and updated database schemas using **Prisma** and **PostgreSQL**.
- Integrated third-party platforms like **Instagram** and **TikTok** using their APIs.
- Built and styled user interfaces using **Tailwind CSS** and **MUI**.
- Improved chat systems using **Twilio** for real-time messaging.
- Built and validated complex forms with **React Hook Form** and **Yup**.
- Worked with **Stripe** integrations including coupons, checkout sessions, webhooks, and referral systems.
- Implemented **PayTabs** for in-app payments with proper error handling and state management.
- Designed and developed **responsive app screens** from Figma designs.
- Created reusable components and handled navigation logic in **React Native** apps.
- Improved performance metrics like **CLS** and **TBT** across production builds.

TECHNICAL SKILLS

Frontend:

React.js, Next.js, React Native, TypeScript, JavaScript, Vue.js, Nuxt.js, Tailwind CSS, MUI, styled-components, CSS3, HTML5, React Query, Zustand, React Hook Form, Toastify

Backend:

NestJS, Prisma, PostgreSQL, Firebase (Firestore, Auth), API Integration, NextAuth

Dev Tools & Others:

Stripe, PayTab, Twilio, Docker, Figma, Copilot

EDUCATION

BSCS | NED University of Engineering & Technology **2020-24**
CGPA: 3.677
